# Public Hospital Services File Format 2021-2022 Collection Year

### Introduction

This document specifies the file format for the electronic submission of admitted patient data by facilities providing public hospital services. This data is submitted to the Statistical Services Branch (SSB), Queensland Department of Health for the Queensland Hospital Admitted Patient Data Collection (QHAPDC).

A record must be provided for each admitted patient, including newborn babies, from facilities permitted to admit patients.

All boarders and posthumous organ procurement donors are also included in the scope of the QHAPDC.

There are 13 files specified in this document: Header, Patient, Admission, Activity, Morbidity, Mental Health, Elective Admissions, Sub and Non-Acute Patient, Palliative Care, Department of Veterans' Affairs, Workers' Compensation, Australasian Rehabilitation Outcomes Centre and Telehealth Inpatient Details.

The following standard should be used when naming the files:

fffffctyyctyynnn.filetype

fffff five-digit facility number (zero filled from the left)

ctyyctyy collection year to which the data relates

nnn data extract number for collection year

filetype

- HDR for the Header File
- PAT for the Patient File
- ADM for the Admission File
- ACT for the Activity File
- MOR for the Morbidity File
- MEN for the Mental Health File
- EAS for the Elective Admission File
- SNP for the Sub and Non-Acute Patient File
- PAL for the Palliative Care File
- DVA for the Department of Veterans' Affairs File
- WCP for the Workers' Compensation File
- ARC for the Australasian Rehabilitation Outcomes Centre File
- TID for the Telehealth Inpatient Details File

The 1st admission file for ABC Hospital (facility number 99999) for collection year 2021-2022 would be named:

9999920212022001.ADM

Data for multiple months or a partial month can be supplied in the one extract file. The data extract number for a collection year must begin at '001' and be contiguous throughout the collection year.

# **Public Facility File Format**

# **Header file**

The header file contains an extraction details record (the facility and period for which data has been extracted, and the date the extraction took place) and file details records (the number and type of records on each file).

The extraction details record is the first record on the Header File. There should be only one extraction details record in the Header File.

For each file extracted, there must be a file details record on the Header File.

| EXTRACTION DETAILS RECORD |         |                                 |  |
|---------------------------|---------|---------------------------------|--|
| Record Identifier         | 1 char  | E = Extraction details          |  |
| Facility Number           | 5 num   | Must be a valid facility number | Right adjusted and zero filled from left |
| Extract Period            | 16 date | From date                       | CTYYMMDD                                 |
|                           |         | To date                         | CTYYMMDD                                 |
| Extract Date              | 8 date  | Date data extracted             | CTYYMMDD                                 |

| FILE DETAILS R       | ECORD  |   |  |
|----------------------|--------|---|--|
| Record Identifier    | 1 char | F = File details                                    |  |
| File Type            | 3 char | PAT = Patient                                       |  |

ADL scores for each SNAP episode are to be supplied. Do not provide more than one set of scores on the same date for the same ADL Type and ADL Subtype.

For all SNAP episodes:

• An ADL score of 999 is valid when an assessment has not been undertaken.

# **Mental Health File**

A record is to be provided on the mental health details file for each episode of care where the standard unit code (either at admission to the episode or through a unit transfer during the episode) is in the range PYAA to PYZZ.

No record is to be provided if there were no standard unit codes in this range during the episode of care.

The header record is the first record on the file. There is only one header record, followed by the mental health details records.

| HEADER RECOR                         | RD      |  |   |

### **Elective Admission Surgery File**

A record is to be provided on the elective admissions details file for each episode of care where one or more completed EAS entries have been linked to the episode of care.

Each episode of care can have one or more EAS entry linked to it.

The header record is the first record on the file. There is only one header record, followed by the elective admission details records.

| HEADER RECOR                         | HEADER RECORD |  |   |  |  |
|--------------------------------------|---------------|--|---|--|--|
| Facility Number                      | 5 num         | Must be the same as the facility number in the corresponding header file | Right adjusted and zero filled from left                        |  |  |
| Extract Period                       | 16 date       | From date  | CTYYMMDD  |  |  |
|                                      |               | To date  | CTYYMMDD  |  |  |

### Sub and Non-Acute Patient (SNAP) File

A record for each SNAP type is to be provided on the sub and non-acute patient details file for each episode of care where the care type is sub-acute or non-acute (i.e. Rehabilitation Care, Geriatric Evaluation and Management Care, Palliative Care, Psychogeriatric Care or Maintenance Care)

No record is to be provided if the care type is mental health, acute, newborn, boarder, organ procurement-posthumous or other care.

The header record is the first record on the file. There is only one header record, followed by the sub and non-acute patient details records.

| HEADER RECORD                        |         |  |  |  |

For Rehabilitation Care, Geriatric Evaluation and Management Care, Palliative Care, Psychogeriatric Care SNAP Episodes

At least one set of mandatory ADL scores must be provided for each SNAP episode.

There can only be one SNAP episode within a single sub-acute episode of care.

The start date of the SNAP episode must be the same as the start date of the episode of care.

The end date of the SNAP episode must be the same as the end date of the episode of care.

#### For Maintenance SNAP Episodes

At least one set of mandatory ADL scores must be provided for each SNAP episode.

There must be at least one SNAP episode within a single non-acute episode of care.

If there is more than one SNAP episode then these must be contiguous.

The start date of the first SNAP episode must be the same as the start date of the episode of care. The end date of the last SNAP episode must be the same as the end date of the episode of care.

### **Palliative Care File**

A record is to be provided on the palliative care details file for each episode of care where the care type is: 30 = Palliative care. No record is to be provided if the care type is NOT 30.

The header record is the first record on the file. There is only one header record, followed by the palliative care details records.

### Workers' Compensation File

A record is to be provided on the Workers' Compensation file where the charges for the episode of care are eligible to be met by a Queensland workers' compensation insurer. This is currently defined as those episodes where the payment class is 'WCQ' or 'WCQI'.

A record is not to be provided if the charges for the episode of care are not eligible to be met by a Queensland workers' compensation insurer.

The header record is the first record on the file. There is only one header record, followed by the Workers' Compensation Details records.

### **Australian Rehabilitation Outcomes Centre File**

The header record is the first record on the file. From 1 July 2013 AROC data will not be entered on HBCIS and only the header record will be provided in the AROC extract file.

### **Telehealth Inpatient Details File**

A record is to be provided on the HQI Telehealth Inpatient Details file for each Telehealth event within an episode of care as recorded on the Telehealth Inpatient Details HBCIS screen.

A record should not be provided where a Telehealth service has not been provided to an admitted patient.

The header file is the first record on the file. There is only one header record, followed by the Telehealth Inpatient Details records.

| HEADER RECO                          | HEADER RECORD |  |   |  |  |

### Mental Health details records

A record is to be provided on the mental health details file for each episode of care where the standard unit code (either at admission to the episode or through a unit transfer during the episode) is in the range PYAA to PYZZ.

No record is to be provided if there were no standard unit codes in this range during the episode of care.

| Data Item                                    | Guidelines   |
|--|--|
| Record Identifier                            | Must be a valid value  |
|  | Must not be null   |
| Unique Number                                | Must not be used more than once by a facility  |
|  | Must not be null   |
|  | Must not be zero   |
|  | Must be unique for each admission within the facility                                    |
|  | All records related to each admission must have the same unique number of that admission |
| Patient Identifier                           | Must not be null   |
|  | Must not be zero   |
|  | Must be unique for each patient within the facility                                      |
| Admission Number                             | Must not be null   |
|  | Must not be zero   |
|  | Must be unique for each admission of a particular patient within the facility            |
| Type of Usual<br>Accommodation               | Must not be null   |
|  | Validated against the type of usual accommodation codes                                  |
| Employment Status                            | Must not be null   |
|  | Validated against the employment status codes  |
|  | If 1 then age must be < 18   |
|  | If 3, 4, or 6 then age must be $> 14$  |
| Pension Status                               | Must not be null   |
|  | Validated against pension status codes   |
|  | If 1 then age must be > 59 if female and > 64 if male                                    |
|  | If 2 to 5 then age must be between 14 and 65   |
| First Admission For<br>Psychiatric Treatment | Must not be null   |
|  | Validated against the previous admission for psychiatric treatment codes                 |
| Referral To Further Care                     | Must not be null   |
|  | Validated against referral to further care codes   |
| Mental Health Legal Status<br>Indicator      | Must not be null   |
|  | Validated against legal status indicator codes   |

| Data Item                 | Guidelines  |
|---------------------------|---|
| Previous Specialised Non- | Must not be null  |
| admitted Treatment        | Validated against previous specialised non-admitted treatment codes |

## **Elective Admission Surgery details records**

A record is to be provided on the elective admissions details file for each episode of care where one or more completed EAS entries have been linked to the episode of care.

Each episode of care can have one or more EAS entry linked to it.

| Data Item           | Guidelines   |  |
|---------------------|--|--|
| Record Identifier   | Must be a valid value  |  |
|                     | Must not be null   |  |
| Unique Number       | Must not be used more than once by the facility  |  |
|                     | Must not be null   |  |
|                     | Must not be zero   |  |
|                     | Must be unique for each admission within the facility                                    |  |
|                     | All records related to each admission must have the same unique number of that admission |  |
| Patient Identifier  | Must not be null   |  |
|                     | Must not be zero   |  |
|                     | Must be unique for each patient within the facility                                      |  |
| Admission Number    | Must not be null   |  |
|                     | Must not be zero   |  |
|                     | Must be unique for each admission of a particular patient within the facility            |  |
| Entry Number        | Must not be null   |  |
|                     | Must not be zero   |  |
| Planned Unit        | Not currently required, no validation  |  |
| Surgical Speciality | Must not be null   |  |
|                     | Validated against the waiting list speciality codes                                      |  |
| Waiting List Status | Not currently required, no validation  |  |
| Reason for Removal  | Can be null  |  |
|                     | Validated against the waiting list status reference file                                 |  |
| Listing Date        | Must be a valid date   |  |
|                     | Must not be after the admission date   |  |
|                     | Must not be in the future  |  |
|                     | Must not be null   |  |
| Pre-admission Date  | Not currently required, no validation  |  |
| (planned)           |  |  |
| Urgency Category    | Must not be null   |  |
|                     | Validated against the waiting list category codes reference file                         |  |
| Accommodation       | Must not be null   |  |

| Data Item   | Guidelines  |  |  |
|---|---|--|--|
|   | Validated against the waiting list accommodation codes reference file |  |  |
| Site Procedure Indicator  | Not currently required, no validation                                 |  |  |
| National Procedure Indicator  | Not currently required, no validation                                 |  |  |
| Planned Length of Stay  | Must not be null  |  |  |
|   | Must be numeric   |  |  |
|   | Zero values accepted  |  |  |
| Planned Admission Date  | Not currently required, no validation                                 |  |  |
| Pre-admission Clinic<br>Attendance Date                             | Not currently required, no validation                                 |  |  |
| Planned Procedure Date Must be a valid date                         |   |  |  |
|   | Can be after the admission date                                       |  |  |
|   | Can be null   |  |  |
|   | Must not be null if reason for removal = 01                           |  |  |
|   | Cannot be greater than 15 years after the listing date                |  |  |
| Facility Identifier of the<br>hospital managing the waiting<br>list | Not currently required, no validation                                 |  |  |
| Planned Primary Procedure   | Validated against a list of planned primary procedure codes           |  |  |
| Code  | Must not be null  |  |  |

### Sub and Non-Acute Patient details records

A record for each SNAP type is to be provided on the sub and non-acute patient details file for each episode of care where the care type is sub-acute or non-acute (i.e. Rehabilitation Care, Geriatric Evaluation and Management Care, Palliative Care, Psychogeriatric Care or Maintenance Care)

No record is to be provided if the care type is mental health, acute, newborn, boarder, organ procurement-posthumous or other care.

| Data Item                       | Guidelines  |  |
|---------------------------------|---|--|
| Record Identifier               | Must be a valid value   |  |
|                                 | Must not be null  |  |
| Unique Number                   | Must not be used more than once by the facility   |  |
|                                 | Must not be null  |  |
|                                 | Must not be zero  |  |
|                                 | Must be unique for each admission within the facility   |  |
|                                 | All records related to each admission must have the same unique number of that admission  |  |
| Patient Identifier              | Must not be null  |  |
|                                 | Must not be zero  |  |
|                                 | Must be unique for each patient within the facility   |  |
| Admission Number                | Must not be null  |  |
|                                 | Must not be zero  |  |
|                                 | Must be unique for each admission of a particular patient within the facility   |  |
| SNAP Episode Number             | Must not be null  |  |
|                                 | Must not be zero  |  |
| SNAP Type                       | Must not be null  |  |
|                                 | Validated against a list of SNAP type codes   |  |
|                                 | For Palliative care only PAL is valid   |  |
|                                 | For Rehabilitation care only RCD, ROI, RST, RBD, RNE, RSC, RAL, RPS, ROF, ROR, ROA, RCA, RMT, RPU, RDE, RDD, RBU, RAR are valid |  |
|                                 | For Geriatric Evaluation and Management care only GEM is valid  |  |
|                                 | For Maintenance care only MRE, MNH, MCO, MOT are valid  |  |
|                                 | For Psychogeriatric care only PSG is valid  |  |
| AN-SNAP Group<br>Classification | Not currently required, no validation   |  |

| Data Item                              | Guidelines  |
|--|---|
| SNAP Episode Start Date                | Must not be null  |
|  | Must be a valid date  |
|  | Must not be in the future (i.e. past current date)  |
|  | Must not be before the birth date of the patient  |
|  | Must be on or after the admission date  |
|  | Must be before or on the separation date  |
| SNAP Episode End Date                  | Must not be null  |
|  | Must be a valid date  |
|  | Must not be in the future (i.e. past current date)  |
|  | Must be on or after the admission date  |
|  | Must be before or on the separation date  |
| Multidisciplinary Care Plan            | Must be a valid value   |
| Flag                                   | Must not be null if SNAP Type is Rehabilitation, Geriatric Evaluation and Management, Palliative or Psychogeriatric |
| Multidisciplinary Care Plan            | Must be a valid date  |
| Date                                   | Must not be in the future (i.e. past current date)  |
|  | Must be before or on the separation date  |
|  | Can be null   |
| Proposed Principal Referral<br>Service | Must not be null if SNAP Type is Rehabilitation, Geriatric Evaluation and Management, Palliative or Psychogeriatric |
|  | Validated against the list of proposed service codes  |
| Primary Impairment Type                | Must not be null if SNAP Type is Rehabilitation   |
|  | Validated against the list of Primary Impairment Type codes   |
| Clinical Assessment Only<br>Indicator  | Not currently required, no validation   |

#### For Maintenance Care SNAP Episodes:

At least one set of mandatory ADL scores must be provided for each SNAP episode.

There must be at least one SNAP episode within a single non-acute episode of care.

If there is more than one SNAP episode then these must be contiguous.

The start date of the first SNAP episode must be the same as the start date of the episode of care.

The end date of the last SNAP episode must be the same as the end date of the episode of care.

# For Rehabilitation Care, Geriatric Evaluation and Management Care, Palliative Care and Psychogeriatric Care SNAP Episodes:

At least one set of mandatory ADL scores must be provided for each SNAP episode.

There can only be one SNAP episode within a single sub-acute episode of care.

The start date of the SNAP episode must be the same as the start date of the episode of care. The end date of the SNAP episode must be the same as the end date of the episode of care.

## Palliative care details records

A record is to be provided on the palliative care details file for each episode of care where the care type is: 30 = Palliative care

No record is to be provided if the care type is NOT 30.

| Data Item                             | Guidelines   |  |
|---------------------------------------|--|--|
| Record Identifier                     | Must be a valid value  |  |
|                                       | Must not be null   |  |
| Unique Number                         | Must not be used more than once by the facility  |  |
|                                       | Must not be null   |  |

## **Department of Veterans' Affairs details records**

A record is to be provided on the Department of Veterans' Affairs patient details file where the charges for the episode of care are met by the Department of Veterans' Affairs.

A record is not to be provided if the charges for the episode of care are not met by the Department of Veterans' Affairs.

| Data Item          | Guidelines   |  |  |
|--------------------|--|--|--|
| Record Identifier  | Must be a valid value  |  |  |
|                    | Must not be null   |  |  |
| Unique Number      | Must not be used more than once by the facility  |  |  |
|                    | Must not be null   |  |  |
|                    | Must not be zero   |  |  |
|                    | Must be unique for each admission within the facility                                    |  |  |
|                    | All records related to each admission must have the same unique number of that admission |  |  |
| Patient Identifier | Must not be null   |  |  |
|                    | Must not be zero   |  |  |
|                    | Must be unique for each patient within the facility                                      |  |  |
| Admission Number   | Must not be null   |  |  |
|                    | Must not be zero   |  |  |
|                    | Must be unique for each admission of a particular patient within the facility            |  |  |
| DVA File Number    | Must not be null   |  |  |
| DVA Card Type      | Must not be null   |  |  |
|                    | Must be a valid Card Type code   |  |  |

## **Workers Compensation records**

A record is to be provided on the Workers' Compensation details file where the charges for the episode of care are met by WorkCover Queensland. This is currently defined as those episodes where the payment class is 'WCQ' or 'WCQI'.

A record is not to be provided if the charges for the episode of care are not met by WorkCover Queensland.

## **Australian Rehabilitation Outcomes Centre records**

From 1 July 2013 AROC data will not be entered on HBCIS and only the header record will be provided in the AROC extract file.

## **Telehealth Admission details records**

A record is to be provided on the Telehealth admissions details file where a Telehealth service has been provided to an admitted patient.

| Data Item                              | Guidelines   |  |
|--|--|--|
| Record Identifier                      | Must be a valid value  |  |
|  | Must not be null   |  |
| Unique Number                          | Must not be used more than once by the facility  |  |
|  | Must not be null   |  |
|  | Must not be zero   |  |
|  | Must be unique for each admission within the facility                                    |  |
|  | All records related to each admission must have the same unique number of that admission |  |
| Patient Identifier                     | Must not be null   |  |
|  | Must not be zero   |  |
|  | Must be unique for each patient within the facility                                      |  |
| Admission Number                       | Must not be null   |  |
|  | Must not be zero   |  |
|  | Must be unique for each admission of a particular patient within the facility            |  |
| Telehealth Event (session)             | Must not be null   |  |
| Identifier                             | Must not be zero   |  |
|  | Must be a valid facility number  |  |
| Retrieval Services<br>Queensland (RSQ) | Not currently required, no validation  |  |
| Provider Facility                      | Must not be null   |  |
|  | Must be a valid facility code  |  |
| Provider Unit                          | If RSQ is 1 (yes), then provider unit must be null                                       |  |

|  | Must not be null   |  |

| Data Item                | Guidelines                                    |
|--------------------------|---|
| End Date                 | Must be a valid date                          |
|                          | Must be after the start date                  |
|                          | Must not be in the future                     |
|                          | Must not be null                              |
| End Time                 | Must be a valid time                          |
|                          | Must not be null                              |
| Event Count              | Must not be null                              |
| Total Duration           | Must not be null                              |
|                          | Must be numeric                               |
| Average Duration         | Must not be null                              |
|                          | Must be numeric                               |
|                          | Zero values accepted                          |
| Telehealth Provider Type | Must not be null                              |
|                          | Must be a valid Telehealth provider type code |

## **Public Processing Rules**

The processing rules apply to New (N), Amendment (A), Delete (D) and Up to date (U) records.

### **RECORD IDENTIFIER = N**

#### **Description:**

Patient separated in the extract period or patient separated prior to the extract period but not previously submitted (late insertion).

#### **Patient File**

• A corresponding record must exist in the admission file.

#### **Admission File**

- Admission record must not already exist.
- A corresponding record must exist in the patient file.
- Patient must be separated in the extract period or patient separated prior to extract period but not previously submitted (late insertion).
- Late insertions for the current financial year can be received up to and including the extraction for August data of the next financial year (due in early October).

#### **Activity File**

- A corresponding record must exist in the admission file and in the patient file.
- All activities must occur within the admission and separation dates.

Account Class Variations

o Must not already exist.

#### Leave

- o Must not already exist.
- o Leave period must not overlap with any other leave periods for admission.

Ward Transfer

o Must not already exist for admission.

#### **Contract Status**

o Must not already exist for admission.

Not Ready For Surgery

- o Must not already exist for admission.
- Not ready for surgery period must not overlap with any other not ready for surgery periods for admission.

**Qualification Status** 

o Must not already exist for admission.

**Elective Surgery Items** 

o Must not already exist for admission.

Sub and Non-acute Patient Items

- o Must not already exist for admission.
- Nursing Home Type Patient Items
  - Must not already exist for admission.
- **Delayed Assessed Separation Event** 
  - o Must not already exist for admission.
  - o Event period must not overlap with any other event periods for admission.

Patient Identifier of mother of baby born in hospital

o Must not already exist for admission.

### **Morbidity File**

- A corresponding record must exist in the admission file and in the patient file.
- The ICD-10-AM code must not already exist for this admission except for procedure, morphology and external cause codes.

### **Mental Health File**

- A corresponding record must exist in the admission file and in the patient file.
- Must not already exist for admission.
- Must exist if any standard unit code in the activity or admission file is in the range PYAA to PYZZ.

### **Elective Admission Surgery File**

- A corresponding record must exist in the admission file and in the patient file.
- Must not already exist for admission.

### Sub and Non-Acute Patient File

- A corresponding record must exist in the admission file and in the patient file.
- Must not already exist for admission.

### **Palliative Care File**

- A corresponding record must exist in the admission file and in the patient file.
- Must not already exist for admission.

### **Department of Veterans' Affairs File**

- A corresponding record must exist in the admission file and in the patient file.
- Must not already exist for admission.

### Workers' Compensation File

- A corresponding record must exist in the admission file and in the patient file.
- Must not already exist for admission.

## **Telehealth Inpatient Details File**

- A corresponding record must exist in the admission file and in the patient file.
- Must not already exist for admission.

## **RECORD IDENTIFIER = A**

#### **Description:**

Amendment to records submitted prior to the extract period. Amendment records for the current financial year can be received up to and including the extraction of July data of the next financial year (due in early September).

These processing rules also apply to Up to Date records previously sent.

#### Patient File

• Patient record must exist.

#### **Admission File**

• Admission record must exist

#### **Activity File**

• Cannot be amended, must instead be deleted and re-created.

#### **Morbidity File**

• Cannot be amended, must instead be deleted and re-created.

#### **Mental Health File**

• Mental Health record must exist.

#### **Elective Admission Surgery File**

• Elective Admission Surgery record must exist.

#### Sub and Non-acute Patient File

• Sub and Non-acute Patient record must exist.

#### **Palliative Care File**

• Palliative Care patient record must exist.

#### **Department of Veterans' Affairs File**

• Department of Veterans' Affairs record must exist.

### Workers' Compensation File

• Workers' Compensation record must exist.

### **Telehealth Inpatient Details File**

• Telehealth Inpatient record must exist.

### **RECORD IDENTIFIER = D**

#### **Description:**

Deletion of any record previously sent. Deletion records for the current financial year can be received up to and including the extraction of July data of the next financial year (due in early September).

These processing rules also apply to Up to Date records previously sent.

#### **Patient File**

• Deletion is not applicable to patient records.

#### **Admission File**

• The admission record must exist.

#### **Activity File**

- Only the one record matching the previously submitted record exactly will be deleted. Account Class Variations
  - o The record must exist

Leave

- o The record must exist
- Ward Transfer
  - o The record must exist
- **Contract Status** 
  - o The record must exist
- Not Ready For Surgery
  - o The record must exist

**Qualification Status** 

o The record must exist

**Elective Surgery Items** 

- o The record must exist
- Sub and Non-acute Items
  - o The record must exist
- Nursing Home Type Patient Items
  - o The record must exist
- **Delayed Assessed Separation Event** 
  - o The record must exist
- Patient Identifier of mother of baby born in hospital
  - o The record must exist

### **Morbidity File**

- All morbidity records in relation to that admission will be deleted.
- The morbidity record must exist.

#### **Mental Health File**

• Mental Health record must exist.

#### **Elective Admission Surgery File**

• Elective Admission Surgery record must exist.

#### **Sub and Non-Acute Patient File**

• Sub and Non-acute Patient record must exist.

#### **Palliative Care File**

• Palliative Care record must exist.

### **Department of Veterans' Affairs File**

• Department of Veterans' Affairs record must exist.

#### Workers' Compensation File

• Workers' Compensation record must exist.

### **Telehealth Inpatient Details File**

• Telehealth Inpatient record must exist.

## **RECORD IDENTIFIER = U**

#### **Description:**

Patient admitted during, or prior to, the extract period but who is not separated in the extract period.

A 'U' Up to Date record identifier replaces a 'N' New record identifier when the Up to Date record is first supplied in the extract. All amendments to an up to date record should be provided using the processing rules applied to end dated records. Following the separation of a patient the end date of the record will be provided in the extract as an amendment record within the admission file.

#### **Patient File**

• A corresponding record must exist in the admission file.

#### **Admission File**

- Admission record must not already exist.
- A corresponding record must exist in the patient file.
- Patient admitted during or prior to extract period but who is not separated in extract period or separated prior to extract period but not previously submitted (late insertion).
- During each collection period there will be a 'refresh point' for U records. This will entail SSB deleting all existing U records. Therefore, all records that meet the 'U' criteria, including those records that have been previously supplied, are required to be submitted in the first extract following the extract period for August data.

### **Activity File**

- A corresponding record must exist in the admission file and in the patient file.
- All activities must occur within the admission and extract period to dates.

Account Class Variations

o Must not already exist.

Leave

- o Must not already exist.
- o Leave period must not overlap with any other leave periods for admission.

Ward Transfer

o Must not already exist for admission.

**Contract Status** 

o Must not already exist for admission.

Not Ready For Surgery

- o Must not already exist for admission.
- Not ready for surgery period must not overlap with any other not ready for surgery periods for admission.

**Qualification Status** 

o Must not already exist for admission.

**Elective Surgery Items** 

- o Must not already exist for admission.
- Sub and Non-acute Patient Items
  - o Must not already exist for admission.
- Nursing Home Type Patient Items
  - Must not already exist for admission.
- **Delayed Assessed Separation Event** 
  - o Must not already exist for admission.
  - Event period must not overlap with any other event periods for admission.

Patient Identifier of mother of baby born in hospital

o Must not already exist for admission.

### **Morbidity File**

- A corresponding record must exist in the admission file and in the patient file.
- The ICD-10-AM code must not already exist for this admission except for procedure, morphology and external cause codes.

#### **Mental Health File**

- A corresponding record must exist in the admission file and in the patient file.
- Must not already exist for admission.
- Must exist if any standard ward/unit code in the activity or admission file is in the range PYAA to PYZZ.

### **Elective Admission Surgery File**

- A corresponding record must exist in the admission file and in the patient file.
- Must not already exist for admission.

### **Sub and Non-Acute Patient File**

- A corresponding record must exist in the admission file and in the patient file.
- Must not already exist for admission.

#### **Palliative Care File**

- A corresponding record must exist in the admission file and in the patient file.
- Must not already exist for admission.

#### **Department of Veterans' Affairs File**

- A corresponding record must exist in the admission file and in the patient file.
- Must not already exist for admission.

### Workers' Compensation File

- A corresponding record must exist in the admission file and in the patient file.
- Must not already exist for admission.

#### **Telehealth Inpatient Details File**

- A corresponding record must exist in the admission file and in the patient file.
- Must not already exist for admission.

## Private Facility File Format 2021-2022 Collection Year

### Introduction

This document specifies the file format for the electronic submission of admitted patient data by private facilities. This data is submitted to the Statistical Services Branch (SSB), Queensland Department of Health for the Queensland Hospital Admitted Patient Data Collection (QHAPDC).

A record must be provided for each admitted patient, including newborn babies, separated from facilities permitted to admit patients. Separated is an inclusive term meaning discharged, died, transferred or statistically separated.

All boarders and posthumous organ procurement donors are also included in the scope of the QHAPDC.

SSB is able to electronically process amendments if the facility's patient record system is capable of supplying amendment and deletion records. These records have a record identifier of 'A' or 'D' as detailed in the following file format. Please inform your SSB contact prior to your facility commencing the reporting of any amendments and deletion records electronically.

There are 9 files specified in this document: Header, Patient, Admission, Activity, Morbidity, Mental Health, Sub and Non-Acute Patient, Palliative Care and Department of Veterans' Affairs.

The following is our standard when naming the files:

#### fffffctyyctyynnn.filetype

- fffff five-digit facility number (zero filled from the left)
- ctyyctyy collection year to which the data relates
- nnn data extract number for collection year
- filetype HDR for the Header File
  - PAT for the Patient File
  - ADM for the Admission File
  - ACT for the Activity File
  - MOR for the Morbidity File
  - MEN for the Mental Health File
  - SNP for the Sub and Non-Acute Patient File
  - PAL for the Palliative Care file
  - DVA for the Department of Veterans' Affairs File

# The 4<sup>th</sup> admission file for ABC Hospital (facility number 99999) for collection year 2021-2022 would be named:

#### 9999920212022004.ADM

You are able to supply data for multiple months or for a partial month in the one extract file. The data extract number for a collection year must begin at '001' and be contiguous throughout the collection year. The extract periods must also be contiguous throughout the collection year.

## **Private Facility File Format**

### **Header File**

The header file contains an extraction details record (the facility and period for which data has been extracted, and the date the extraction took place) and file details records (the number the type of records on each file).

The extraction details record is the first record on the Header File. There should be only one extraction details record in the Header File.

For each file extracted, there must be a file details record on the Header File.

| EXTRACTION DETAILS RECORD |         |                                 |  |
|---------------------------|---------|---------------------------------|--|
| Record Identifier         | 1 char  | E = Extraction details          |  |
| Facility Number           | 5 num   | Must be a valid facility number | Right adjusted and zero filled from left |
| Extract Period            | 16 date | From date                       | CTYYMMDD                                 |
|                           |         | To date                         | CTYYMMDD                                 |
| Extract Date              | 8 date  | Date data extracted             | CTYYMMDD                                 |

| FILE DETAILS R       | ECORD  |                                       |  |
|----------------------|--------|---------------------------------------|--|
| Record Identifier    | 1 char | F = File details                      |  |
| File Type            | 3 char | PAT = Patient                         |  |
|                      |        | ADM = Admission                       |  |
|                      |        | ACT = Activity                        |  |
|                      |        | MOR = Morbidity                       |  |
|                      |        | MEN = Mental Health                   |  |
|                      |        | SNP = Sub and Non-Acute Patient       |  |
|                      |        | PAL = Palliative Care                 |  |
|                      |        | DVA = Department of Veterans' Affairs |  |
| Record Type          | 1 char | N = New                               |  |
| Number of<br>Records | 5 num  | Number of new records                 | Right adjusted and zero filled from left; zero if null |
| Record Type          | 1 char | A = Amendment                         |  |
| Number of<br>Records | 5 num  | Number of amendment records           | Right adjusted and zero filled from left; zero if null |
| Record Type          | 1 char | D = Deletion                          |  |

| FILE DETAILS RECORD  |       |                            |  |  |
|----------------------|-------|----------------------------|--|--|
| Number of<br>Records | 5 num | Number of deletion records | Right adjusted and zero filled from left; zero if null |  |
| Filler               | 8     | Blank                      |  |  |

An example of a header file is:

E99999202107012021073120210820 FPATN00420A00020D00000 FADMN00420A00124D00001 FACTN00080A00000D00010 FMORN01000A00000D00005 FMENN00020A00000D00001 FSNPN00010A00002D00001 FPALN00008A00001D00002 FDVAN00003A00001D00001

The details provided by the above example are:

#### **Extraction details**

| Facility          | 99999 - ABC Private Hospital |
|-------------------|------------------------------|
| Extraction period | 1 July 2021 to 31 July 2021  |
| Extraction date   | 20 August 2021               |

#### File details

Patient file

- 420 New records
- 20 Amendments
- 0 Deletions

#### Admission details

- 420 New records
- 124 Amendments
- 1 Deletions

#### Activity

- 80 New records
- 0 Amendments
- 10 Deletions

Morbidity details

- 1000 New records
- 0 Amendments
- 5 Deletions

Mental Health details

- 20 New records
- 0 Amendments
- 1 Deletions

#### Sub and Non-Acute Patient file details

- 10 New records
- 2 Amendments
- 1 Deletions

#### Palliative Care details

- 8 New records
- 1 Amendments
- 2 Deletions

#### Department of Veterans' Affairs details

- 3 New records
- 1 Amendments
- 1 Deletions

## **Patient File**

The header record is the first record on the file. There is only one header record, followed by the patient details records.

| HEADER RECORD                        |         |  |  |
|--------------------------------------|---------|--|--|
| Facility Number                      | 5 num   | Must be the same as the facility number in the corresponding header file | Right adjusted and zero filled from left               |
| Extract Period                       | 16 date | From date  | CTYYMMDD   |
|                                      |         | To date  | CTYYMMDD   |
| File Type                            | 3 char  | Abbreviation to identify file type<br>PAT = Patient                      |  |
| Number of<br>Records                 | 5 num   | Total number of records in the file                                      | Right adjusted and zero filled from left; zero if null |
| Extraction<br>Software<br>Identifier | 10 char | Code to identify the version of the software used                        | Left adjusted, blank if null                           |
| Filler                               | 234     | Blank  |  |

| PATIENT DETAILS RECORDS           |         |   |  |
|-----------------------------------|---------|---|--|
| Record Identifier                 | 1 char  | N = New   |  |
|                                   |         | A = Amendment   |  |
| Unique Number                     | 12 char | A number unique within the facility to identify each<br>admission. This number is not to be reused,<br>regardless of deletions, etc.  | Right adjusted and zero filled from left |
| Patient Identifier                | 8 char  | Unique number to identify the patient within the facility (e.g. Unit record number)   | Right adjusted and zero filled from left |
| Admission<br>Number               | 12 char | Admission number allocated by the facility  | Right adjusted and zero filled from left |
| Family Name                       | 24 char | First 24 characters of the patients surname   | Left adjusted                            |
| First Given<br>name               | 15 char | First 15 characters of the patients first given name  | Left adjusted, blank if null             |
| Second Given<br>name              | 15 char | First 15 characters of second given name of patient   | Left adjusted, blank if null             |
| Address of<br>Usual               | 40 char | Number and street of usual residential address of patient   | Blank if null                            |
| Residence                         |         | Note: Post office box numbers, property names<br>(with no other details, eg include access road<br>name with the property name), or mail service<br>numbers should NOT be recorded. |  |
| Location of<br>Usual<br>Residence | 40 char | Location associated with the permanent address  |  |

| PATIENT DETAIL                    | LS RECO | RDS  |               |
|-----------------------------------|---------|--|---------------|
| Postcode of<br>Usual              | 4 num   | Australian postcode associated with the permanent address.   |               |
| Residence                         |         | Supplementary codes as below (note that for Australian External Territory addresses, the actual postcode should be used).                      |               |
|                                   |         | 9301 = Papua New Guinea  |               |
|                                   |         | 9302 = New Zealand   |               |
|                                   |         | 9399 = Overseas other (not PNG or NZ)  |               |
|                                   |         | 9799 = At sea  |               |
|                                   |         | 9989 = No fixed address  |               |
|                                   |         | 0989 = Not stated or unknown   |               |
| State of Usual Residence          | 1 num   | State associated with the permanent address<br>(note that for Australian External Territory<br>addresses, the actual state id should be used). |               |
|                                   |         | 0 = Overseas   |               |
|                                   |         | 1 = New South Wales  |               |
|                                   |         | 2 = Victoria   |               |

ADL scores for each SNAP episode are to be supplied. Do not provide more than one set of scores on the same date for the same ADL Type and ADL Subtype.

For all SNAP episodes:

An ADL score of 999 is valid when an assessment has not been undertaken.

### **Mental Health File**

A record is to be provided on the mental health details file for each episode of care where the standard unit code (either at admission to the episode or through a unit transfer during the episode) is in the range PYAA to PYZZ.

No record is to be provided if there were no standard unit codes in this range during the episode of care.

The header record is the first record on the file. There is only one header record, followed by the mental health details records.

| HEADER RECO                          | HEADER RECORD |  |  |  |  |
|--------------------------------------|---------------|--|--|--|--|

### **Sub and Non-Acute Patient Details File**

SNAP information is required for all sub and non-acute patients with a public chargeable status.

A record for each SNAP type is to be provided on the sub and non-acute patient details file for each episode of care where the care type is sub-acute or non-acute (ie Rehabilitation Care, Geriatric Evaluation and Management Care, Palliative Care, Psychogeriatric Care or Maintenance Care)

No record is to be provided if the care type is mental health, acute, newborn, boarder, organ procurement-posthumous or other care.

The header record is the first record on the file. There is only one header record, followed by the sub and non-acute patient details records.

| HEADER RECORD                        |         |  |  |  |
|--------------------------------------|---------|--|--|--|

For Rehabilitation Care, Geriatric Evaluation and Management Care, Palliative Care, Psychogeriatric Care SNAP Episodes

At least one set of mandatory ADL scores must be provided for each SNAP episode.

There can only be one SNAP episode within a single sub-acute episode of care.

The start date of the SNAP episode must be the same as the start date of the episode of care.

The end date of the SNAP episode must be the same as the end date of the episode of care.

#### For Maintenance SNAP Episodes

At least one set of mandatory ADL scores must be provided for each SNAP episode.

There must be at least one SNAP episode within a single non-acute episode of care.

If there is more than one SNAP episode then these must be contiguous.

The start date of the first SNAP episode must be the same as the start date of the episode of care. The end date of the last SNAP episode must be the same as the end date of the episode of care.

### **Palliative Care File**

A record is to be provided on the palliative care details file for each episode of care where the care type is: 30 = Palliative care

No record is to be provided if the care type is NOT 30.

The header record is the first record on the file. There is only one header record, followed by the palliative care details records.

|                             | Must be a valid date  |
|                             | Must not be in the future (i.e. past current date)                            |
|                             | Must not be before the birth date of the patient                              |
|                             | Must be before or on the separation date                                      |
| Time of Admission           | Must not be null  |
|                             | Must be a valid time  |
|                             | Must be before the separation time, if admitted the same day as separated     |
| Account Class               | Not currently required, no validation   |
| Chargeable Status           | Validated against a list of chargeable status codes                           |
|                             | Must not be null  |
| Care Type                   | Validated against a list of type of episode codes                             |
|                             | Must not be null  |
| Compensable Status          | Validated against a list of compensable status codes                          |
|                             | Must not be null  |
| Band                        | Validated against a list of band codes, if not null                           |
|                             | Must be a same day patient  |
| Source of Referral/Transfer | Validated against a list of source of referral/transfer codes                 |
|                             | Must not be null  |
| Transferring from Facility  | Must not be null if source of referral/transfer is 16, 23, 24, 25 or 31       |
|                             | Only applicable if source of referral/transfer is 16, 23, 24, 25 or 31        |
|                             | Must be a valid facility number   |
|                             |   |

| Data Item                    | Guidelines  |
|------------------------------|---|
| Hospital Insurance           | Validated against list of hospital insurance codes  |
|                              | Must not be null  |
| Separation Date              | Must not be null  |
|                              | Must be a valid date  |
|                              | Must not be in the future (ie. past current date)   |
|                              | Must be on or after the admission date  |
| Separation Time              | Must not be null  |
|                              | Must be a valid time  |
|                              | Must be after admission time, if separated the same day                                       |
| Mode of Separation           | Must not be null  |
|                              | Validated against a list of mode of separation codes  |
| Transferring to Facility     | Must not be null if mode of separation is 12, 16, 21 or 31                                    |
|                              | Only applicable if mode of separation is 12, 16, 21 or 31                                     |
|                              | Must be a valid facility number   |
| DRG                          | Not currently required, no validation   |
| MDC                          | Not currently required, no validation   |
| Baby Admission Weight        | Must not be null if patient age is under 29 days, or admission weight is less than 2500 grams |
| Admission Ward               | Must not be null  |
|                              | No validation   |
| Admission Unit               | No validation   |
| Standard Unit Code           | Must not be null  |
|                              | Must be a valid standard unit code  |
| Treating Doctor at admission | No validation   |
| Planned Same Day             | Must be Y or N  |
| Elective Patient Status      | Must not be null  |
|                              | Must be a valid elective patient status code  |
| Qualification Status         | Can be null   |
|                              | Validated against a list of qualification status codes  |
| Standard Ward Code           | Can be null   |
|                              | Must be a valid standard ward code  |
| Contract Role                | Can be null   |
|                              | Must be a valid contract role code  |
| Contract Type                | Can be null   |
|                              | Must be a valid contract type code  |

| Data Item  | Guidelines  |
|--|---|
| Funding Source   | Must not be null  |
|  | Validated against a list of funding source codes  |
|  | If Funding Source = 10 then contract role and contract type cannot be null                  |
| Incident Date  | Not currently required, no validation   |
| Incident Date Flag                                       | Not currently required, no validation   |
| WorkCover Queensland (Q-<br>Comp) Consent                | Not currently required, no validation   |
| Motor Accident Insurance<br>Commission (MAIC)<br>Consent | Not currently required, no validation   |
| Department of Veterans'<br>Affairs (DVA) Consent         | Not currently required, no validation   |
| Department of Defence<br>Consent                         | Not currently required, no validation   |
| Interpreter Required                                     | Not currently required, no validation   |
| Religion   | Not currently required, no validation   |
| QAS Patient Identification                               | Can be null   |
| Number (eARF Number)                                     | Validated against source of referral/transfer   |
| Purchaser/Provider                                       | Must be a valid establishment number  |
| Identifier   | Must not be null if contract role = A or B and contract type = 2, 3, 4 or $5$               |
|  | Must not be null if contract role = B and Contract Type = 1 and chargeable status is public |
| Length of Stay in an<br>Intensive Care Unit              | Must not be null if treatment was provided in an ICU Level 6 or CIC Service Level 6         |
| Duration of Continuous<br>Ventilatory Support            | Must not be null if the patient received continuous ventilatory support                     |

### Activity details records

| Data Item          | Guidelines   |
|--------------------|--|
| Record Identifier  | Must be a valid value  |
|                    | Must not be null   |
| Unique Number      | Must not be used more than once by the facility  |
|                    | Must not be null   |
|                    | Must not be zero   |
|                    | Must be unique for each admission within the facility                                    |
|                    | All records related to each admission must have the same unique number of that admission |
| Patient Identifier | Must not be null   |
|                    | Must not be zero   |
|                    | Must be unique for each patient within the facility                                      |
| Admission Number   | Must not be null   |
|                    | Must not be zero   |
|                    | Must be unique for each admission of a particular patient within the facility            |
| Activity Code      | Must be a valid code (A, L, W, C, Q, S, T, B)  |

### Activity Code = A

| Data Item          | Guidelines   |
|--------------------|--|
| Account Class Code | Currently not required, no validation                |
| Chargeable Status  | Validated against a list of chargeable status codes  |
| Compensable Status | Validated against a list of compensable status codes |
| Date of Change     | Valid date format                                    |
|                    | Must not be null                                     |
|                    | Must not be before the admission date                |
|                    | Must not be after the separation date                |
| Time of Change     | Not currently required, no validation                |

### Activity Code = L

| Data Item              | Guidelines                                   |
|------------------------|--|
| Date of Starting Leave | Must be a valid date                         |
|                        | Must not be null                             |
|                        | Must not be before the admission date        |
|                        | Must not be after the separation date        |
|                        | Must not fall within any other leave periods |
|                        | Same day and overnight leave are required    |

| Time of Starting Leave   | Must be a valid time                         |
|--------------------------|--|
| Time of Starting Leave   |  |
|                          | Must not be null                             |
|                          | Same day and overnight leave are required    |
| Date Returned from Leave | Must be a valid date                         |
|                          | Must not be null                             |
|                          | Must be after the date of starting leave     |
|                          | Must not be after the separation date        |
|                          | Must not fall within any other leave periods |
|                          | Same day and overnight leave are required    |
| Time Returned from Leave | Must be a valid time                         |
|                          | Must not be null                             |
|                          | Same day and overnight leave are required    |

### Activity Code = W

| Data Item          | Guidelines                                   |
|--------------------|--|
| Ward               | Must not be null                             |
|                    | No validation                                |
| Unit               | No validation                                |
| Standard Unit Code | Must be valid standard unit code             |
|                    | Must not be null                             |
| Date of Transfer   | Must be a valid date                         |
|                    | Must not be in the future                    |
|                    | Must not be before the admission date        |
|                    | Must not be within any leave periods         |
|                    | Must not be after the separation date        |
|                    | Must not be null                             |
| Time of Transfer   | Must be a valid time                         |
|                    | Must not be null                             |
| Standard Ward Code | Can be null                                  |
|                    | Must be a valid standard ward code of 'SNAP' |

### Activity Code = C

| Data Item                        | Guidelines  |
|----------------------------------|---|
| Date Transferred for<br>Contract | Must be a valid date  |
|                                  | Must not be within any leave periods  |
|                                  | Must not be before the admission date   |
|                                  | Must not be after the separation date   |
|                                  | Must not be in future   |
|                                  | Must not be null  |
|                                  | Must not be after date returned from contract   |
| Date Returned from               | Must be a valid date  |
| Contract                         | Must not be within any leave periods  |
|                                  | Must not be before the admission date   |
|                                  | Must not be after the separation date   |
|                                  | Must not be in future   |
|                                  | Must not be null  |
|                                  | Must not be before the date transferred for contract  |
| Facility Contracted to           | Must not be null if there is a date transferred for contract<br>Must be a valid facility number |

### Activity Code = Q

| Data Item            | Guidelines   |
|----------------------|--|
| Qualification Status | Must not be null                                     |
|                      | Validated against list of qualification status codes |
| Date of Change       | Must be a valid date                                 |
|                      | Must not be before the admission date                |
|                      | Must not be after the separation date                |
|                      | Must not be in the future                            |
|                      | Must not be null                                     |
| Time of Change       | Not currently required, no validation                |

### Activity Code = S

SNAP information is required for all sub and non-acute patients with a public chargeable status.

| Data Item           | Guidelines  |
|---------------------|---|
| SNAP Episode Number | Must not be null  |
|                     | Must not be zero  |
| ADL Type            | Must not be null  |
|                     | Validated against a list of ADL type codes  |
| ADL Subtype         | Must not be null  |
|                     | Validated against a list of ADL subtype codes   |
| ADL Score           | Must not be null  |
|                     | Validated against a list of ADL scores  |
|                     | ADL scores for each SNAP episode are to be supplied. Do not provide more than one set of scores on the same date for the same ADL Type and ADL Subtype. |
|                     | For all SNAP episodes:  |
|                     | An ADL score of 999 is valid when an assessment has not been undertaken.  |
| ADL Date            | Must be a valid date  |
|                     | Must not be before the admission date   |
|                     | Must not be after the separation date   |
|                     | Must not be in future   |
|                     | Must not be null  |
| ADL Time            | Not currently collected, no validation  |
| Phase Type          | Can be null   |
|                     | Must not be null if SNAP type = PAL   |
|                     | Validated against list of phase type codes  |

### Activity Code = T

| Data Item              | Guidelines                                  |
|------------------------|---|
| Nursing Home Type Flag | Must not be null                            |
|                        | Must be a valid Nursing Home Flag code      |
|                        | Not valid for patients with a care type of: |
|                        | 01 – Acute                                  |
|                        | 05 – Newborn                                |
|                        | 07 – Organ Procurement-posthumous           |
|                        | 08 – Boarder                                |

| Data Item            | Guidelines                                      |
|----------------------|---|
| Date Commenced NHT   | Must be a valid date                            |
| Care                 | Must not be before the admission date           |
|                      | Must not be after the separation date           |
|                      | Must not be in the future                       |
|                      | Must not be null                                |
|                      | Must be before the date ceased NHT care         |
|                      | Must not fall within any other NHT periods      |
|                      | Same day and overnight NHT periods are required |
| Date Ceased NHT Care | Must be a valid date                            |
|                      | Must not be before the admission date           |
|                      | Must not be after separation date               |
|                      | Must not be in the future                       |
|                      | Must not be null                                |
|                      | Must be after the date commenced NHT care       |
|                      | Must not fall within any other NHT periods      |
|                      | Same day and overnight NHT periods are required |

### Activity Code = B

| Data Item                   | Guidelines  |
|-----------------------------|---|
| Mother's Patient Identifier | Must not be zero                                      |
|                             | Must be unique for each patient within the facility   |
|                             | Must not be null for Source of Referral/Transfer = 09 |

### Morbidity details records

| Data Item                 | Guidelines  |
|---------------------------|---|
| Record Identifier         | Must be a valid value   |
|                           | Must not be null  |
| Unique Number             | Must not be used more than once by the facility   |
|                           | Must not be null  |
|                           | Must not be zero  |
|                           | Must be unique for each admission within facility   |
|                           | All records related to each admission must have the same unique number of that admission                                |
| Patient Identifier        | Must not be null  |
|                           | Must not be zero  |
|                           | Must be unique for each patient within the facility   |
| Admission Number          | Must not be null  |
|                           | Must not be zero  |
|                           | Must be unique for each admission of a particular patient within the facility   |
| Diagnosis Code Identifier | Must not be null  |
|                           | Validated against list of diagnosis code types  |
|                           | Every separation must have one and only one PD  |
|                           | Cannot have an OD, EX, PR or M without a PD   |
|                           | Cannot have a PD, OD, EX, M following a PR  |
| ICD-10-AM /ACHI Code      | Must not be null  |
| (11th edition)            | Please refer to Queensland Hospital Admitted Patient Data Collection manual for the sequencing of ICD-10-AM/ACHI codes. |
| Diagnosis Text            | Text is optional, as ICD-10-AM/ACHI codes must be supplied.   |
| Date of Procedure         | Must be a valid date  |
|                           | Must not be in the future   |
|                           | Must not be null for procedures with block codes between:   |
|                           | 1 to 1059   |
|                           | 1062 to 1821  |
|                           | 1825 to 1866  |
|                           | 1869 to 1892  |
|                           | 1894 to 1912  |
|                           | 1920 to 2016  |
| Contract Flag             | Validated against a list of contract flag codes   |
| Diagnosis Onset Type      | Validated against a list of Diagnosis Onset Type codes  |
| (Condition onset flag)    | Must not be null if Diagnosis Code Identifier = PD, OD, EX or M   |

| Most Resource Intensive<br>Condition Flag | Not currently required, no validation |
|---|---------------------------------------|
| Other Co-Morbidity of<br>Interest Flag    | Not currently required, no validation |

### Mental Health details records

A record is to be provided on the mental health details file for each episode of care where the standard unit code (either at admission to the episode or through a unit transfer during the episode) is in the range PYAA to PYZZ.

No record is to be provided if there were no standard unit codes in this range during the episode of care.

| Data Item                | Guidelines   |
|--------------------------|--|
| Record Identifier        | Must be a valid value  |
|                          | Must not be null   |
| Unique Number            | Must not be used more than once by a facility  |
|                          | Must not be null   |
|                          | Must not be zero   |
|                          | Must be unique for each admission within the facility                                    |
|                          | All records related to each admission must have the same unique number of that admission |
| Patient Identifier       | Must not be null   |
|                          | Must not be zero   |
|                          | Must be unique for each patient within the facility                                      |
| Admission Number         | Must not be null   |
|                          | Must not be zero   |
|                          | Must be unique for each admission of a particular patient within the facility            |
| Type of Usual            | Must not be null   |
| Accommodation            | Validated against the type of usual accommodation codes                                  |
| Employment Status        | Must not be null   |
|                          | Validated against the employment status codes  |
|                          | If 1 then age must be < 18   |
|                          | If 3, 4, or 6 then age must be $> 14$  |
| Pension Status           | Must not be null   |
|                          | Validated against pension status codes   |
|                          | If 1 then age must be > 59 if female and > 64 if male                                    |
|                          | If 2 to 5 then age must be between 14 and 65   |
| First Admission For      | Must not be null   |
| Psychiatric Treatment    | Validated against the previous admissions for psychiatric treatment codes                |
| Referral To Further Care | Must not be null   |
|                          | Validated against referral to further care codes   |

| Mental Health Legal Status<br>Indicator         | Must not be null<br>Validated against legal status indicator codes                      |  |
|---|---|--|
| Previous Specialised Non-<br>admitted Treatment | Must not be null<br>Validated against previous specialised non-admitted treatment codes |  |

### Sub and Non-Acute Patient details records

SNAP information is required for all sub and non-acute patients with a public chargeable status.

A record for each SNAP type is to be provided on the sub and non-acute patient details file for each episode of care where the care type is sub-acute or non-acute (i.e. Rehabilitation Care, Geriatric Evaluation and Management Care, Palliative Care, Psychogeriatric Care or Maintenance Care)

No record is to be provided if the care type is mental health, acute, newborn, boarder, organ procurement-posthumous or other care.

| Data Item                       | Guidelines  |
|---------------------------------|---|
| Record Identifier               | Must be a valid value   |
|                                 | Must not be null  |
| Unique Number                   | Must not be used more than once by the facility   |
|                                 | Must not be null  |
|                                 | Must not be zero  |
|                                 | Must be unique for each admission within the facility   |
|                                 | All records related to each admission must have the same unique number of that admission  |
| Patient Identifier              | Must not be null  |
|                                 | Must not be zero  |
|                                 | Must be unique for each patient within the facility   |
| Admission Number                | Must not be null  |
|                                 | Must not be zero  |
|                                 | Must be unique for each admission of a particular patient within the facility   |
| SNAP Episode Number             | Must not be null  |
|                                 | Must not be zero  |
| SNAP Type                       | Must not be null  |
|                                 | Validated against a list of SNAP type codes   |
|                                 | For Palliative care only PAL is valid   |
|                                 | For Rehabilitation care only RCD, ROI, RST, RBD, RNE, RSC, RAL, RPS, ROF, ROR, ROA, RCA, RMT, RPU, RDE, RDD, RBU, RAR are valid |
|                                 | For Geriatric Evaluation and Management care only GEM is valid  |
|                                 | For Maintenance care only MRE, MNH, MCO, MOT are valid  |
|                                 | For Psychogeriatric care only PSG is valid  |
| AN-SNAP Group<br>Classification | Not currently required, no validation   |

| Data Item                              | Guidelines  |
|--|---|
| SNAP Episode Start Date                | Must not be null  |
|  | Must be a valid date  |
|  | Must not be in the future (i.e. past current date)  |
|  | Must not be before the birth date of the patient  |
|  | Must be on or after the admission date  |
|  | Must be before or on the separation date  |
| SNAP Episode End Date                  | Must not be null  |
|  | Must be a valid date  |
|  | Must not be in the future (i.e. past current date)  |
|  | Must be on or after the admission date  |
|  | Must be before or on the separation date  |
| Multidisciplinary Care Plan            | Must be a valid value   |
| Flag                                   | Must not be null if SNAP Type is Rehabilitation, Geriatric Evaluation and Management, Palliative or Psychogeriatric |
| Multidisciplinary Care Plan            | Must be a valid date  |
| Date                                   | Must not be in the future (i.e. past current date)  |
|  | Must be before or on the separation date  |
|  | Can be null   |
| Proposed Principal Referral<br>Service | Must not be null if SNAP Type is Rehabilitation, Geriatric Evaluation and Management, Palliative or Psychogeriatric |
|  | Validated against the list of proposed principal referral service codes   |
| Primary Impairment Type                | Must not be null if SNAP Type is rehabilitation   |
|  | Validated against the list of Primary Impairment Type codes   |
| Clinical Assessment Only<br>Indicator  | Not currently required, no validation   |

#### For Maintenance Care SNAP Episodes:

At least one set of mandatory ADL scores must be provided for each SNAP episode.

There must be at least one SNAP episode within a single non-acute episode of care.

If there is more than one SNAP episode then these must be contiguous.

The start date of the first SNAP episode must be the same as the start date of the episode of care.

The end date of the last SNAP episode must be the same as the end date of the episode of care.

## For Rehabilitation Care, Geriatric Evaluation and Management Care, Palliative Care and Psychogeriatric Care SNAP Episodes:

At least one set of mandatory ADL scores must be provided for each SNAP episode.

There can only be one SNAP episode within a single sub-acute episode of care.

The start date of the SNAP episode must be the same as the start date of the episode of care.

The end date of the SNAP episode must be the same as the end date of the episode of care.

### **Palliative Care details records**

A record is to be provided on the palliative care details file for each episode of care where the care type is: 30 = Palliative care

No record is to be provided if the care type is NOT 30.

| Data Item  | Guidelines   |
|--|--|
| Record Identifier  | Must be a valid value  |
|  | Must not be null   |
| Unique Number  | Must not be used more than once by the facility  |
|  | Must not be null   |
|  | Must not be zero   |
|  | Must be unique for each admission within the facility                                    |
|  | All records related to each admission must have the same unique number of that admission |
| Patient Identifier   | Must not be null   |
|  | Must not be zero   |
|  | Must be unique for each patient within the facility                                      |
| Admission Number   | Must not be null   |
|  | Must not be zero   |
|  | Must be unique for each admission of a particular patient within the facility            |
| First Admission For<br>Palliative Care Treatment                   | Must not be null   |
|  | Validated against the first admission for palliative care treatment codes                |
| Previous Specialised Non-<br>Admitted Palliative Care<br>Treatment | Must not be null   |
|  | Validated against the previous specialised non-admitted palliative care treatment codes  |

### **Department of Veterans' Affairs details records**

A record is to be provided on the Department of Veterans' Affairs patient details file where the charges for the episode of care are met by the Department of Veterans' Affairs.

A record is not to be provided if the charges for the episode of care are not met by the Department of Veterans' Affairs.

| Data Item          | Guidelines   |
|--------------------|--|
| Record Identifier  | Must be a valid value  |
|                    | Must not be null   |
| Unique Number      | Must not be used more than once by the facility  |
|                    | Must not be null   |
|                    | Must not be zero   |
|                    | Must be unique for each admission within the facility                                    |
|                    | All records related to each admission must have the same unique number of that admission |
| Patient Identifier | Must not be null   |
|                    | Must not be zero   |
|                    | Must be unique for each patient within the facility                                      |
| Admission Number   | Must not be null   |
|                    | Must not be zero   |
|                    | Must be unique for each admission of a particular patient within the facility            |
| DVA File Number    | Must not be null   |
| DVA Card Type      | Must not be null   |
|                    | Must be a valid Card Type code   |

### **Private Processing Rules**

### **RECORD IDENTIFIER = N**

#### **Description:**

Patient separated in the extract period or patient separated prior to the extract period but not previously submitted (late insertion).

#### **Patient File**

1. A corresponding record must exist in the admission file.

#### **Admission File**

- Admission record must not already exist.
- A corresponding record must exist in the patient file.
- Patient must be separated in the extract period or patient separated prior to the extract period but not previously submitted (late insertion).
- Late insertions for the current financial year can be received up to and including the extraction for August data of the next financial year (due in early October).

#### **Activity File**

- A corresponding record must exist in the admission file and in the patient file.
- All activities must occur within the admission and separation dates.

Account Class Variations

o Must not already exist.

Leave

o Leave period must not overlap with any other leave periods for admission.

Ward Transfer

o Must not already exist for admission.

**Contract Status** 

- o Must not already exist for admission.
- **Qualification Status** 
  - o Must not already exist for admission.
- Nursing Home Type Patient Items
  - Must not already exist for admission.
- Sub and Non-acute Patient Items
  - o Must not already exist for admission.
- Patient Identifier of mother of baby born in hospital
  - o Must not already exist for admission.

#### **Morbidity File**

- A corresponding record must exist in the admission file and in the patient file.
- The ICD-10-AM code must not already exist for this admission except for procedure, morphology and external cause codes.

#### **Mental Health**

- A corresponding record must exist in the admission file and in the patient file.
- Must not already exist for admission.
- Must exist if any standard unit code in the activity or admission file is in the range PYAA to PYZZ.

#### **Sub and Non-Acute Patient File**

- A corresponding record must exist in the admission file and in the patient file.
- Must not already exist for admission.

#### **Palliative Care**

- A corresponding record must exist in the admission file and in the patient file.
- Must not already exist for admission.

#### **Department of Veterans' Affairs**

- A corresponding record must exist in the admission file and in the patient file.
- Must not already exist for admission.

### **RECORD IDENTIFIER = A**

#### **Description:**

Amendment to records submitted prior to the extract period. Amendment records for the current financial year can be received up to and including the extraction of August data of the next financial year (due in early October).

#### **Patient File**

• Patient record must exist.

#### **Admission File**

• Admission record must exist

#### **Activity File**

• Cannot be amended. Must instead be deleted and re-created.

#### **Morbidity File**

• Cannot be amended. Must instead be deleted and re-created.

#### **Mental Health File**

• Mental Health record must exist.

#### **Sub and Non-acute Patient File**

• Sub and Non-acute Patient record must exist.

#### **Palliative Care File**

• Palliative Care patient record must exist.

#### **Department of Veterans' Affairs File**

• Department of Veterans' Affairs record must exist.

### **RECORD IDENTIFIER = D**

#### **Description:**

Deletion of any record previously sent. Deletion records for the current financial year can be received up to and including the extraction of August data of the next financial year (due in early October).

#### **Patient File**

• Deletion is not applicable to patient records.

#### **Admission File**

• The admission record must exist.

#### **Activity File**

- Only the one record matching the previously submitted record exactly will be deleted. Account Class Variations
  - The record must exist

Leave

o The record must exist

Ward Transfer

o The record must exist

**Contract Status** 

- o The record must exist
- **Qualification Status** 
  - o The record must exist

Nursing Home Type Patient Items

o The record must exist

Sub and Non-acute Items

o The record must exist

Patient Identifier of mother of baby born in hospital

o The record must exist

#### **Morbidity File**

- All morbidity records in relation to that admission will be deleted.
- The morbidity record must exist.

#### **Mental Health File**

• Mental health record must exist.

#### **Sub and Non-Acute Patient File**

• Sub and non-acute patient record must exist.

### **Palliative Care File**

• Palliative care record must exist.

### **Department of Veterans' Affairs File**

• Department of Veterans' Affairs record must exist.
