RTI Released

Significant Incident Review Template Version 1.0 August 2020

Gold Coast District

Authority:

By authority of Andrew Hebborn, Assistant Commissioner Gold Coast Region.

Executive Summary:

On Tuesday, 20 September 2022, Queensland Ambulance Service (QAS) received a request for service for a **Irrelevant** male fallen over. The case was first received by New South Wales Ambulance Service and referred to QAS to generate CN 16450422 for **Irrelevant** Currumbin QLD 4223. The case was initially generated as a 2A upgraded to 1A – 17B01G – Fall on floor Possible Dangerous Area.

QAS initial response B601558 as the case was originally coded as a 2A. B601558 initial SITREP led to the case being upgraded to a 1A with an additional Bravo unit, CCP POD and HARU being attached to the case.

Following treatment regime protocol, a signal 4 was called and subsequent request for Queensland Police Service (QPS) to location as per Standard Operating Procedure (SOP).

The original call was placed by a first party caller (the patient) via Ambulance NSW – and was relayed to the Southport OpCen. Following this call, the QAS EMD made contact with the caller who provided updated details. The Ambulance Medical Officer within the Clinical Hub conducted a call back after around 40 minutes and spoke to the patient with no new information provided to alter the current coding – and the case remained a code 2A.

The initial response was from Gold Coast University Hospital and arrived on scene 31 minutes from time of dispatch and declared “*Cardiac Arrest*” within 5 minutes. The HARU, CCP Pod and a backup ACP unit were dispatched arriving at this time.

Resuscitation efforts on scene were unsuccessful and the patient was declared deceased – and QPS requested.

The Gold Coast region at the time of call was experiencing minimal pending caseload. A review of the 15-minute intervals revealed a maximum of 3 cases were pending on the Gold Coast at 8.30pm and, of those cases, two (2) were Code 1 with the longest wait time of being this case at 25 minutes. The next 2 intervals increased with an additional code 1 case and the longest wait time at 55 minutes. In the interval after this case was dispatched – there were no pending cases on the Gold Coast. These interval periods are attached as appendices.

The Gold Coast QPS DTAC advised the patient had no family Next of Kin available, and they had notified a long-time friend of the patient's passing.

Terms of Reference:

This review will investigate all aspects of ambulance response to incidents CN 16450422. The review will examine ambulance operations prior to, during and following the response.

This review will include all requirements outlined in the *Operational Incident Review Process*.

Region Clinical Incident Summary Report:

The Gold Coast Manager Clinical Education reviewed the clinical aspects of the incident and advised:

“... *The patient was in cardiac arrest on arrival and managed appropriately.*
...[CEU has no} concerns clinically.”

Queensland Ambulance Service: Operational Incident Reporting

State OpCen ProQA:

The State Communications Development – Quality Assurance Unit conducted a Special Review of the calls related to this incident.

The review identified some moderate deviations with the initial call (Ambulance NSW to Southport OpCen) however the coding applied was correct based on the information provided.

The review also identified the EMD correctly conducted a call back to the patient (first party call) and reapplied coding with was correct based on the details provided – with only moderate deviations.

The review informed that the notes recorded by the AMO-CHUB corresponded with the call back.

Incident Review/Investigation:

- This review is being considered due to a potential delay in response.
- Signal 4 patient with potential media interest.
- Case transferred from Ambulance NSW to QAS

Background:

On Tuesday, 20 September 2022, Queensland Ambulance received a request for service for a 59-year-old male fallen over. The case was first received by New South Wales Ambulance and referred to QAS to generated CN 16450422 for **Irrelevant** Currumbin QLD 4223. The case was initially generated as a 2A upgraded to 1A – 17B01G – Fall on floor Possible Dangerous Area.

The call was generated by the patient with the call initially going through to ASNSW before being transferred to the QAS.

At 20:44 the AMO – CHUB spoke to patient who was outside having a cigarette and fell to ground. He advised hit the back of his head which was bleeding (ceased now), however currently feels dizzy with pain at the back of his head. The patient was also experiencing a sore chest; tender to touch and not on anti-coagulants. He has crawled inside and is now just inside front door. Medications include pantoprazole and heart meds. He has pins and needles all over his body. The patient was advised regarding delays.

Resuscitation efforts on scene resulted in Signal 4 being call with QPS requested.

Timeline: a clear timeline of events of the OIRR from receipt of the Triple Zero (000) call;

CN 16450422

20:07	000 call received
20:15	Call back occurred – caller states unknown why he fell or been on the ground and has now moved back into his unit
20:30	Gold Coast - 3 Pending longest - 10 mins
20:44	AMO – CHUB carried out a call back, phone assessment completed and advised of delays.
20:45	Gold Coast - 2 pending – longest 55 min (this case CN 16450422)
21:07	Case dispatched assigned as a 2A
21:38	First crew on scene
21:44	Case upgraded to a 1A following SITREP of Cardiac Arrest
21:44	A606415 and B601536 assigned
21:45	A606853 assigned
21:54	CDS notified the SOS on call
22:19	Patient Signal 4 QPS required

Queensland Ambulance Service: Operational Incident Reporting

QAS Response (received to Scene) time: 1hr 21mins

Post OIRR actions:

- Debrief occurred amongst officers assigned to the incident.
- Priority one activated Southport OpCen
- GC Director and AC advised of the incident.
- The GC SOS contacted QPS DTAC to identify family/NOK – only a long-term friend was contacted by QPS
- DD deemed it appropriate not to contact this friend due to potential privacy concerns

Operational issues identified:

- 000 call to NSW ambulance in the first instance.
- Minimal delays at Hospital during this period.
- Gold Coast Region short night shift officers due to sick and absentee shifts. Multiple attempts made prior to night shift to back fill vacancies.
- Minimal Pending at the time of the incident

Crews:

-
-
-
-

Irrelevant

Queensland Ambulance Service: Operational Incident Reporting

Details of active incidents from 1 hour prior to the incident and while incident was active.

RTI Release

Significant Incident Review

IR73-2022 Wide Bay District Sunshine Coast and Wide Bay Region

Authority:

By authority of the Assistant Commissioner SCWB Region at the direction of the A/District Director Wide Bay, this Significant Incident Review (SIR) was undertaken by Martin Kelly, Senior Operations Supervisor and A/Operations Supervisor Glen Williams. This SIR is in relation to incident 16507809 and has been assigned the unique identifier IR73-2022.

Executive Summary:

On Thursday 4 October 2022 at 19:18 hrs Queensland Ambulance Service (QAS) received a Triple 000 call from a bystander on scene at **Irrelevant** Urraween. The call was in relation to a **Irrelevant** who was said to be self-harming. Caller outside this residence at 19:21. Further information taken during call process from the nurse on-scene at 19:30. QAS initial response coding 2A, 25B03 (Threatening Suicide) at 19:20. Case upgraded to 1B response 25D03 (Psych/Abn Behav not alert) at 19:29 and assigned to first unit at 19:34.

Inter-agency CAD Electronic Messaging System (ICEMS) notification sent to the Queensland Police Service (QPS) at 19:34 with patient's name and age advising patient had self-harmed with blood everywhere, situation unknown and requesting QPS lights and sirens. A further ICEMS sent to QPS at 19:35 advising them that QAS will stage. ICEMS QPS attached at 19:36 and ICEMS from QPS, enroute at 19:38. ICEMS from QPS at 19:40 requesting reason for staging. At 19:40 QAS call taker questioned caller on scene to confirm scene safe for crew entry. 19:43 QPS on scene.

On arrival of the crews, the patient was found lying supine on a bed, Glasgow Coma Score (GCS) 3, QPS applying direct pressure to wrists, with wrists bound in towels. Bandages applied to wrists, nil active bleeding from wounds and wounds appeared dry with faint carotid pulse felt. Pt went into cardiac arrest within minutes of QAS arrival. Patient rapidly extricated and CPR commenced. Rapid transport was initiated to Hervey Bay Hospital with a QPS driver, with the crew departing the scene at 20:00 and arriving at the emergency department at 20:05.

Terms of Reference:

This review is conducted in accordance with the QAS *Operational Incident Review Process*.

Region Clinical review:

- Initial description of scene is well documented, patient appears bradycardic but soon resolves into asystole on moving the patient to stretcher.
- Examination is reasonable no major review of head-to-toe injuries.
- Management reasonable, haemorrhage controlled as priority.
- Patient deteriorated into cardiac arrest.
- CPR commenced and IV access attempted.
- Time on scene to transport for critical patient is well managed.
- The overall vital signs recorded were minimal due to the complexity of the case.

Queensland Ambulance Service: Operational Incident Reporting

Incident Review:

Scope:

Sunshine Coast and Wide Bay Region reviewed the response, clinical performance and operational decision making to ensure appropriate ambulance response and management of this incident. It is intended that any operational, clinical and OpCen performance issues identified are addressed to ensure lessons learnt are used to improve future performance.

Background:

QAS received a Triple 000 call at 19:18 hrs on Thursday 4 October 2022. The caller detailed that a **Irrelevant** female had self-harmed with blood everywhere, trying to go to sleep and they needed help now. Patient is half passed out after slitting her wrists with Registered Nurse (RN) on scene.

Timeline:

19:18- Call received
19:20- In waiting queue
19:29- Case upgraded from 2A to 1B response
19:34- 1st units (4S10) assigned from residence on Emergency Availability (EA) and (C4526) assigned from Hervey Bay Station
19:34- C4526 cancelled prior to dispatch
19:36- B4523 assigned
19:36- B4523 enroute
19:37- 4S10 enroute
19:42- 4S10 and B4523 on scene
19:52- SITREP (Situation report) GCS 3 PT (patient) TX (transport) to HBH
19:56- CPR (Cardiopulmonary resuscitation) in progress
20:00- Departed scene in 4523 to Hervey Bay Hospital
20:05- Arrived Hervey Bay Hospital

Review:

In review of the information available:

- The initial QAS response following receipt of the call in the despatch priority activation phase as a 2A, 25B03 (Threatening Suicide) would appear not to have reflected the seriousness of the presentation associated with the reported blood loss at the scene.
- The initial and follow-up Triple Zero calls to the OpCen would seem to indicate the potential life-threatening nature of the incident.
- The State OpCen QA special review found that the three Triple Zero calls were deemed to be non-complaint with the relevant SOPs in taking into account the blood loss reported and determining the initial despatch priority.
- The response from the operational crews was based on their assessment of the initial information available to them that was received from the OpCen.
- The decision to stage until arrival of QPS or confirmation of scene safety contributed to time taken to access patient on scene.
- It was noted that the bandages applied by the nurse on scene to the patient were dry which could indicate that the blood loss occurred prior the bandages being applied. The amount of blood at the scene would support that there had to be significant blood loss prior the attendance of any bystanders/QAS/QPS.

Queensland Ambulance Service: Operational Incident Reporting

Review Recommendations:

This review makes the following recommendations:

1. Executive Manager, Maroochydore OpCen address issues raised in State OpCen QA special reviews with the Calltaker/EMD as part of their development and OpCen PDO as part of development within the broader work group.
2. QAS review the current system processes associated with decision making in response to assessing scene safety and staging crews, which may result in an associated delay in accessing time critical patients.
3. That all officers who attended the scene be provided access to Priority One support as required.

Appendix of relevant documents/files:

- Briefing notes identifying response information; Notification Brief
- Incident Detail Report (IDR);
- Electronic Ambulance Report Form (eARF);
- ECLIPSE clinical review;
- Relevant audio (wav) files;
- State Quality Assurance Audit of calls.

Endorsement

Significant Incident Review

Mackay District

Authority:

By authority of Graeme McIntyre, Central Queensland, Mackay District Director and as per Directive 08/15, the State District Operations procedure: Operational Incident Review Process and endorsed by the Commissioner to provide an incident report following a significant event.

Executive Summary:

QAS received a Triple Zero call for a 24yom **Irrelevant** QAS responded with a full crew who were staged away from the scene until the residence was secured by QPS. On arrival QPS determined the scene as a potential siege situation following the identification of a potential firearm and identified an exclusion zone. QAS held a staging position for several minutes. Shots were then fired by QPS Officers and QAS was called in to assist with the casualty. The patient was found to be in traumatic cardiac arrest. Basic interventions were administered, and the patient was loaded and transported to Mackay Base Hospital where he was declared life extinct with injuries incompatible with life following resuscitation attempts.

- The incident was located: **Irrelevant** West Mackay
- IDR number: 16718327
- Priority: Code 2A (upgrade 1C patient alone and suicidal)
- Determinant: 25B03B
- Initial response:
 - Mackay Unit 2138 – ACP2 **Irrelevant**
- Additional resources:
 - Senior Operational Supervisor **Irrelevant** in Unit 2534

Terms of Reference:

This review will investigate all aspects of ambulance responses to incident **16718327**.

The review will examine ambulance operations prior to, during and following the response. This will be conducted by **Irrelevant** - Senior Operations Supervisor. This review will include all requirements outlined in the *Operational Incident Review Process*.

Mackay District – In Confidence

Queensland Ambulance Service: Operational Incident Reporting

A District Clinical Incident Summary Report:

A District Level Clinical Review was undertaken by Amanda Martin, Acting Manager of Clinical Education, Mackay District.

The review considered patient assessment, clinical decision making, treatment and cares provided. As well as clinical documentation standards.

- The incident number: 16718327 was reviewed in Eclipse with the following information:
- Eclipse review ID number – 61169
- EARF number - 504882688
- Documentation was at standard.
- The pharmacology was administered as per the QAS Drug Therapy Protocols
- The patient was managed in line with the QAS Clinical Practice Guidelines.
- The clinical interventions did align with the QAS Clinical Practice Procedures.
- Comments left on review: Well, done, this was a dangerous and challenging scene, great management and documentation.
- The final outcome of the review was – at standard and the review was finalised the incident number 16718327 was reviewed in Eclipse with the following information:

Queensland Ambulance Service: Operational Incident Reporting

Incident Review/Investigation:

Scope:

The review of this incident was conducted by **Irrelevant** Senior Operations Supervisor, Mackay District, and considered the following:

- Incident Detail Report, Incident Number 16718327.
- Digital Ambulance Report Form number: 504882688 associated with this incident.
- Geographical data of the incident location in proximity to the resources deployed in response.
- Response times of all QAS resources responding to the incident.
- Skill sets of Officers deployed to the incident.
- Clinical condition of patients involved; and
- Any workplace health and safety issues arising from the incident.

District Quality Assurance Review: Rockhampton Operations Centre

A District Level Quality Assurance review was conducted by **Irrelevant** acting Professional Development officer, Rockhampton Operations Centre.

- a. PROQA Number 19741026
 - b. Comments about the call:
 - i. The customer service the EMD showed during this 000 call was of a very high standard, the EMD showed empathy towards the call and used a clear concise tone. The EMD attempted to get further information from the caller without aggravating the situation and kept the caller calm.
 - ii. Protocol and procedure was followed for this call
 - c. The overall performance of the review: High Compliance, and the review has been finalised.
- Nil further clinical action required, or errors noted.

Background of Incident:

- At 14:17:09 hours Monday afternoon 21st November 2022, Toowoomba Operations Centre received a "000" call to respond to a twenty-four-year-old male patient, **Irrelevant**

Mackay District – in confidence

Queensland Ambulance Service: Operational Incident Reporting

- Incident number: 16718327
- The incident situated at **Irrelevant** West Mackay.
- Initially a Priority 2A case, upgraded to 1C due to the patient being home alone.
- Determinant – 25B03
- At 14:19:54 Mackay Unit 2138 – **Irrelevant** were dispatched as the primary response to the 24-year-old male.
- Mental Health Liaison Clinician, (MHLC), was requested to review the case. Pt was found to have **Irrelevant Irrelevant**
- At 14:22:14 the Emergency Medical Dispatcher, (EMD), attempted a warm transfer to MHLC, however call may have disconnected.
- Patient also had a history of **Irrelevant Irrelevant**
- The MHLC attempted to make contact with the patient, however the call dropped out, or the patient hung-up.
- There was a delay of 12 mins attaching QPS to the incident, as the EMD was busy with another 000 call and forgot to attach QPS to the previous incident.
- At 14:28:43 Unit 2138 staged on **Irrelevant** QPS were also attached to the incident at this time.
- At 14:38:06 QPS arrived on-scene and were unable to make contact with the patient, having to gain entry to the residence by force.
- It was also established at this time the patient had a weapon; however, it was unsure what type of weapon.
- At 14:46:13 Unit 2138 arrived on scene.
- At 15:04:22 Unit 2138 requested backup, due to a potential siege. At this time the Senior Operations Supervisor, (SOS), was attached to the incident in Unit 2534.
- At 15:36:29 Unit 2534 arrived on-scene, due to school traffic congestion, 2534 ungraded to Code 1 while enroute.
- At approximately this time a QPS officer thought the patient had a firearm. QPS immediately cordoned off the area and formed an exclusion zone approximately 300m along Bridge Road.
- QPS evoked the Public Safety Preservation Act, (PSPA), and the area cleared of all persons, excluding QPS personnel.
- SOS notified MBH Team Leader of the Siege, and potential for a trauma patient to arrive at the ED with short notice.

Mackay District – in confidence

Queensland Ambulance Service: Operational Incident Reporting

- SOS requested for a text to be sent out to all Units, instructing to enter and exit Mackay Base Hospital via Streeter Avenue. EMDs were also advising crews of the alternate route when transporting.
- All information was also passed onto the State Operations Co-ordination Centre, SOCC, and Patient Safety Distribution Unit, (PSDU).
- At 17:10 shots were fired by QPS Officers and QAS was called into assist with the casualty at 17:11.
- Soon after QAS arrival the patient was found to be in Traumatic Arrest, basic interventions were administered, and the patient was loaded and transported to Mackay Base Hospital at 17:26:46.
- Unit 2138 arrived at hospital approximately 1 – 2 minutes after departing scene.
- After approximately 15 minutes of resuscitation patient was declared Life Extinct by hospital staff with injuries incompatible with life.

Officer(s) Involved:

Primary Response Officers:		
Officer Name	Classification	Station

Significant Incident Review

Gold Coast District

Authority:

By authority of Andrew Hebborn, Assistant Commissioner Gold Coast Region (GCR).

Executive Summary:

From 1.56pm Monday, 2 January 2023, the Queensland Ambulance Service (QAS) received multiple requests for service via triple zero and ICEMS to attend SeaWorld, SeaWorld Drive, Main Beach for a Multi Casualty Incident (MCI) where two scenic flight helicopters from SeaWorld had collided. There were numerous requests for service received across multiple Operations Centres (OpCens) and as such the initial information was limited and conflicting, however it was reported there were multiple patients with reports of persons deceased.

Initial information was confusing, and it appeared at one stage that there may be two separate incident sites. It was later identified that there was one crash site and both helicopters were located at the same site. On QAS arrival, it was identified the scene was contained on a sandbank approximately one hundred metres across the water from the SeaWorld jetty. One helicopter had crashed, and the other had made an emergency landing on the same sandbank as the crashed helicopter. Access to the sandbank was via marine vessels. In the two helicopters involved there were thirteen patients in total.

GCR Senior Operations Supervisors (SOS) (Day & Afternoon Officers) liaised regarding command and control for the incident. One SOS self-dispatched to GC OpCen to oversee the incident in collaboration with Operations Centre Supervisor (OCS). The other SOS proceeded to the scene to take up the Forward Commander role. The OpCen initiated a separate cell to manage the incident and a multi casualty talk group, 512 was activated to manage communication at the incident scene.

Additionally, operations team (SOS & OCS) maintained contact with State Operations Coordination Centre (SOCC) with incident updates.

The scene was sufficiently resourced to manage the incident. The QAS response included:

- 5x acute Advanced Care Paramedic (ACP) Units
- Mental Health Co-Responder Unit (1 x ACP and 1 x Mental Health Clinician)
- Critical Care Paramedic (CCP) Single officer POD
- High Acuity Response Unit
- 5 x Supervisors (2 x Clinical Support officers, 3 x Officers in Charge (OIC), one of which was a CCP OIC
- 1 x Patient Transport unit
- 2x Rescue Services Queensland helicopters

Additionally Volunteer Marine Rescue (VMR) resources and the Westpac Surf Life Saving Helicopter (Lifesaver 45) (note this helicopter is not set up as a medical response) were in attendance. These volunteer assets had been tasked to a patient who had been involved in a jet ski accident in the Broadwater near by, at the time of the helicopter incident. They were both diverted to this helicopter case, hence supported QAS with the incident.

Other first responder services included

- Queensland Police,
- Queensland Fire and Rescue Service,
- Surf Lifesaving Queensland (SLSQ) Wave Runner Response

Queensland Ambulance Service: Operational Incident Reporting

Terms of Reference:

This review will investigate all aspects of ambulance response to incident 16904068. The review will examine ambulance operations prior to, during and following the response. This review will include all requirements outlined in the *Operational Incident Review Process*.

Region Clinical Incident Summary Report:

The GCR Clinical Education Unit conducted a tabletop review of the clinical management of the incident.

The case has been reviewed as below:

Patients identified (13):

- a) 4 x Deceased injuries incompatible with life
- b) Patient 1: RED – Adult female - DARF completed
- c) Patient 2: RED – 13 YO child - DARF completed
- d) Patient 3: RED – 9 YO child - DARF completed
- e) Patient 4: GREEN
 - a. Nil clinical concerns identified, appropriate assessment given multi-casualty incident (504997399)
- f) Patient 5: GREEN
 - a. Nil clinical concerns identified, appropriate assessment given multi-casualty incident (504997400)
- g) Patient 6: GREEN
 - a. Nil clinical concerns identified, appropriate assessment given multi-casualty incident; Appropriate pain management provided (504997426)
- h) Patient 7: GREEN
 - a. Nil clinical concerns identified, appropriate assessment given multi-casualty incident (504997427)
- i) Patient 8: GREEN
 - a. Nil clinical concerns identified, appropriate assessment given multi-casualty incident (504997429)
- j) Patient 9: GREEN
 - a. Nil clinical concerns identified, transport refused, appropriate assessment given multi-casualty incident and refusal of care (504997430)

Operations Centre:

State level quality assurance conducted and no issues identified - operations centre management of the incident was appropriate.

The triple zero calls received were reviewed and the correct Protocol was selected resulting in a Selection: 29 – Traffic Collision/Transport Incident. The correct Determinant was applied providing a MPDS code: 29D01a - Major Incident (a through h) (Aircraft) resulting in a 1B response and the incident was upgraded to 1A response upon further information being received regarding the patient status.

13:56:56 Initial Triple Zero call was received (INC 16904072)

13:58:04 Initial incident presented in the WIQ (INC 16904068)

13:58:54 Incident was manually upgraded from 1B to 1A (INC 16904068)

13:58:49 Initial Unit assigned as per SOP and CAD Initial Assignment Recommendation (INC 16904068)

A total of 27 triple zero calls were received across the State and all calls and Incident reports are collated.

Queensland Ambulance Service: Operational Incident Reporting

Incident Review/Investigation:

GCR reviewed the response, clinical performance and operational decision making to ensure the appropriate response and management of this case was achieved.

Background:

Witness reports advised two SeaWorld scenic flight helicopters impacted each other during arrival and departure manoeuvres from SeaWorld helipad. Wreckage was located on a sandbank approximately one hundred metres from the SeaWorld Jetty (Helicopter cruise office, Muriel Henchman Drive, Main Beach).

On scene thirteen (13) patients were identified.

- Helicopter 1 had its rotor severed from the body of the helicopter and was positioned upside down in the sand. Six passengers and the Pilot were on board. Three passengers and the Pilot were declared deceased, and three passengers were critically injured.
- Helicopter 2 sustained severe front-end damage. Five passengers and the Pilot were on board. Two passengers and the Pilot suffered minor injuries from embedded glass. Three passengers were uninjured.

Patients:

- Black - four persons - declared deceased and remained on scene.
- Red - three persons - two patients were transported in a critical condition via Ambulance to the Gold Coast University Hospital (GCUH), one other patient was flown to Queensland Children's Hospital (QCH) in a critical condition.
- Green - six persons – 5 were transported to Gold Coast Hospital – Robina Campus (GCHRB) with stable injuries, patient 6 refused transport.

Timeline:

13:56:56 Call received 29D01 Major Incident Helicopter Crash.

13:59:49 B601503 assigned to case; 14:10:26 on scene.

13:59:50 B688111 assigned to case; 14:10:28 on scene.

13:58:52 B688222 assigned to case; 14:10:28 on scene.

13:58:49 S607563 assigned to case; 14:09:05 on scene assumes role of Scene Commander.

14:09:05 Sitrep from 607563 initial sit-rep

14:10:01 QFES on scene.

14:24:09 607563 sit rep confirming 4x Signal 4, 3 x RED patients: Six other patients from second helicopter all GREEN.

14:26:27 607563 please deploy PTS for transport of GREEN patients.

14:29:16 Media Officer on scene

14:31:31 T607311 on scene, officer assumes role of Transport Officer and Officer 2nd officer assumes role of Deputy/Sector Commander.

14:37:53 607563 Request for second helicopter.

14:42:24 R8511 assigned to case.

15:22:00 662756 departs scene with 5 POB to GCRBH (green patients). Arrives 15:57.

15:25:45 607563: Sit-rep 2 x Helo involved.

Queensland Ambulance Service: Operational Incident Reporting

Helicopter 1: Seven patients onboard of which four black, 3 x RED

Helicopter 2: Six patients all GREEN

15:26:58 601509 departs scene with 1 patient to GCUH. Arrives 15:38

15:37:33 8533 departs scene to Brisbane Children's hospital. Arrives 16:01

16:16:21 QAS Scene commander last to depart scene

Further Operational Information:

14:01 GCR SOS contacted and updated A/Assistant Commissioner & A/District Director of the incident.

14:07 GCR A/Assistant Commissioner contacted QAS Deputy commissioner (DC) South to provide an update on the incident.

14:14 GCR A/Assistant Commissioner contacted and updated SOCC room manager regarding the incident.

14:17 GCR A/Assistant Commissioner liaised with QAS Media Director regarding the incident.

- GCR A/Assistant Commissioner continued to make regular contact with GC SOS regarding the incident and updated DC South.

15:30 GCR A/Assistant Commissioner self-dispatched to Southport Station to take up with officers involved in the incident.

15:54 Hot Issues Brief was drafted by Assistant Commissioner, SEQ Operational Planning and Coordination.

17:00 GCR A/Assistant Commissioner completed a Hot Debrief with Officers involved in the incident in collaboration with Counsellor Kirstine Briton at QAS Southport.

18:37 GCR A/District Director contacted and updated the QAS Director of Priority One regarding the incident and Hot Debrief outcome.

18:45 GCR A/District Director contacted and updated DC South regarding the Hot Debrief outcomes.

Note: Lifesaver 45 attended the scene. The SLSQ Rescue Crewman was an off-duty Gold Coast District QAS ACPII, further noting an Off duty CCP Intern (who was off duty) was a witness to the incident and attended on a personal Jetski.

Summary:

High profile incident the scene, occurring in a public place, water environment with access/egress challenges with competing priorities and nation-wide media interest.

Upon review of the incident the principles of the Incident Management System (IMS) were applied. The incident was managed well, while concurrently managing Business as Usual (BAU) operations.

During the event there was good communication between Operations Centres and Districts across South East Queensland (SEQ) Regions to manage operations, including sharing of resources to GCR from Metro South and North to manage BAU and the major incident. There was no compromise to BAU operations during the major incident. The patients from the major incident were managed appropriately and transported as per QAS clinical guidelines.

The MCI processes were applied during the incident and will be reviewed for any learning post event. The feedback from the Hot Debrief supported that multi-casualty principles were applied in accordance with QAS State Major Incident and Disaster plan.

QAS support services were activated, and a staff Hot Debrief was conducted in accordance with QAS guidelines post incident. The Gold Coast A/Assistant Commissioner attended and led the Hot Debrief. Note

Queensland Ambulance Service: Operational Incident Reporting

further support services (QAS Chaplin) attended the incident. Further QAS support services attended the Hot Debrief including the QAS Counsellor, Chaplin, Peer Support officers (PSO) and Fair & Inclusive Practice Network officers.

Review Recommendations:

- GCR have completed a Post Incident Analysis including a review utilisation of MCI command & Control, span of control, allocation of MCI roles and processes, including triage and IMS documentation and use of met-tags.
- Review the role of non-QAS resources such Life Saving resources (Helicopter and Jet Skis), VMR in major incidents.

Outcomes:

- The SOS liaised with SOCC throughout the major incident, SOCC completed notifications, which were later distributed to the appropriate people (this task would usually fall to the SOS on duty). This approach freed the SOS to manage the incident.
- The OpCen separated the incident into an MCI cell and allocated MCI channel to manage the incident to ensure appropriate communication lines from the incident to the OpCen.
- The GCR SOS's divided into a Forward Commander role and the other SOS moved to a Regional Liaison role in the Gold Coast Operations Centre to manage the incident.
- The identified Forward Commander initiated command and control and sectorised the scene allocating sector roles such as Deputy Commander, Marshalling/Transport roles.
- IMS documentation was completed for the major incident.
- The QAS Forward Commander arranged for the six GREEN patients to be transported from the scene via QAS Patient Transport Services early in the incident, to minimise risk to operations.
- Post incident QAS officers supported the general public who witnessed the incident including some of the family of the deceased and severely injured.
- Good teamwork within the QAS Supervisor teams, Operations Centre teams as well as Operational crews.
- Good interagency communication and teamwork.

Post OIRR actions:

- QAS hot debrief occurred post incident 1700 on the 2 Jan 2023
- To ensure all-hazards approach & preparedness for future MCI the GC region will continue a focus on ongoing MCI training at the Strategic, operational and tactical levels as per QAS guidelines.
- Station Officers and Regional Supervisors monitoring staff welfare in the following days.
- Further QAS incident debrief occurred 10 Jan 2023.
