Environmental Impacts

- Weather intelligence from the Bureau of Meteorology (BoM) has been reviewed, with no significant weather impacts expected over the next several days.

Critical Infrastructure

- ICT Major Incident Notification – Cairns operations Centre – Far Northern Region – Community in Isolation - Restored**
At 1323 hrs, 01.06.2024 Telstra advised Yam Island as a Community in Isolation (CII), located in the Torres Strait Far North Queensland. Loss of mobile coverage in Yam Island has the potential to cause a Community Isolation with no fixed line services by design. Investigations identified transmission hardware intermittently failing, likely the cooling fan. Telstra have advised that all services have recovered and remain up, with spare parts ordered with an ETA of 03.06.2024. Telstra advise that no further reporting for this incident will occur.
- ICT Major Incident Notification - Townsville OpCen - Northern Region - Scheduled Mains Power Disruption**
QAS Townsville Station Complex is undergoing scheduled maintenance for asbestos removal to external surfaces of the building. Through QBuild, appropriately licensed contractors are conducting Asbestos removal and remediation for a period of three weeks which commenced 27.05.2024. At 1420 hrs, 30.05.2024, a planned transition from mains power to generators occurred successfully with nil impact to operations. Townsville Station Complex, including the OpCen, is now running on generators, with a plan to transition back to mains power on Monday, 03.06.2024. An Incident Action Plan has been completed by the Region outlining prevention, preparedness, response and recovery activities. Contractors remain available on-call for refuel purposes, if required. A diesel mechanic remains available on 24/7 response should any generator issue occur. FSG and MIM have been briefed and will activate technical units for assistance if required. The Brisbane OpCen Director has been advised of the works as Brisbane OpCen remains the primary redundancy site for Townsville OpCen. Brisbane OpCen will ensure additional dispatchers are rostered to cover Townsville OpCen, should BCP activation be required. QBuild contractors have provided assurance there is no risk of exposure to hazardous materials associated with this event.

- Weather intelligence from the Bureau of Meteorology (BoM) has been reviewed, with no significant weather impacts expected over the next several days.

Critical Infrastructure

- ICT Major Incident Notification - Townsville OpCen - Northern Region - Scheduled Mains Power Disruption**
 QAS Townsville Station Complex is undergoing scheduled maintenance for asbestos removal to external surfaces of the building. Through QBuild, appropriately licensed contractors are conducting Asbestos removal and remediation for a period of three weeks which commenced 27.05.2024. At 1420 hrs, 30.05.2024, a planned transition from mains power to generators occurred successfully with nil impact to operations. Townsville Station Complex, including the OpCen, is now running on generators, with a plan to transition back to mains power on Monday, 03.06.2024. An Incident Action Plan has been completed by the Region outlining prevention, preparedness, response and recovery activities. Contractors remain available on-call for refuel purposes, if required. A diesel mechanic remains available on 24/7 response should any generator issue occur. FSG and MIM have been briefed and will activate technical units for assistance if required. The Brisbane OpCen Director has been advised of the works as Brisbane OpCen remains the primary redundancy site for Townsville OpCen. Brisbane OpCen will ensure additional dispatchers are rostered to cover Townsville OpCen, should BCP activation be required. QBuild contractors have provided assurance there is no risk of exposure to hazardous materials associated with this event.
- ICT Major Incident Notification - Cairns OpCen – Far Northern Region – Communities in Isolation – Restored**
 At 0605 hrs, 02.06.2024 Telstra confirmed that the communities of Thursday Island, Prince of Wales Island, Bamaga and Jardine River were in isolation due to power outage at Bamaga exchange. Telstra power technician arrived on site where he proceeded to isolate a faulty rectifier and reset a tripped circuit breaker restoring services.
- ICT Major Incident Notification - Cairns OpCen – Far Northern Region – OpCen Power Outage – Restored**
 At 0700 hrs, 02.06.2024 Cairns Operations Centre reported an unplanned power outage, generator automatically commenced operation. OpCen SOS confirmed mains power has been restored after electricians replaced a faulty relay switch. It was further reported that a decrease in mains power triggered the generator to be activated. Nil operational impacts were reported during the outage.
- ICT Major Incident Notification - Cairns OpCen – Far Northern Region – Radio Disruption Millman Hill**
 At 1006 hrs, 02.06.2024 Cairns OpCen advise they are unable to hear crews on backup RoIP link via Millman Hill, State OpCen SOS advice that Sat PTT remains operational. RES Cairns advise the Primary link is operational again. RES have also requested that Miles Electronics be called to investigate the secondary link, MIM have contacted Miles Electronics and left a voicemail requesting they call MIM back. No response from Miles Electronics after several attempts on the contact numbers provided
 In consultation with Frontline Support Group (FSG) this call will be suspended until Monday morning when MIM will try to contact Miles Electronics again.

Critical Infrastructure	<ul style="list-style-type: none"> ICT Major Incident Notification - Townsville OpCen - Northern Region - Scheduled Mains Power Disruption - Restored QAS Townsville Station Complex is undergoing scheduled maintenance for asbestos removal to external surfaces of the building. Through QBuild, appropriately licensed contractors are conducting Asbestos removal and remediation for a period of three weeks which commenced 27.05.2024. At 1420 hrs, 30.05.2024, a planned transition from mains power to generators occurred successfully with nil impact to operations. Townsville Station Complex, including the OpCen, is now running on generators, with a plan to transition back to mains power on Monday, 03.06.2024. At 1500 hrs, Townsville Station Complex was successfully transitioned back to mains power. ICT Major Incident Notification - Cairns OpCen – Far Northern Region – Radio Disruption Millman Hill - Restored At 1006 hrs, 02.06.2024 Cairns OpCen advise they are unable to hear crews on backup RoIP link via Millman Hill, State OpCen SOS advice that Sat PTT remains operational. RES Cairns advise the Primary link is operational again. Miles Electronics have attended Cairns OpCen and power cycled both IPRs, the DSRI, the E540 and the modem. They have retested the link and confirm the operators on site successfully achieved 2-way communications on the backup link. ICT Major Incident Notification - Cairns OpCen – Far Northern Region – Radio Degradation - Restored At 1214 hrs, Radio Electronics Section (RES) report they are investigating ongoing intermittent static noise interference during radio transmissions. Radio quality due to static noise is reported between OpCen to Crews, Crews to OpCen and directly between Crews. Impacted areas include Kuranda, Silkwood, Mossman, Cooktown, Edmonton, Malanda and Babinda. RES Cairns have advised that the fault maybe related to a Motorola console at the OpCen. RES has contacted the OpCen who has reported that the last static noise was at 0937 hrs. RES will continue to monitor the radio link to ensure interference is no longer present.

Critical Infrastructure	<ul style="list-style-type: none"> ICT Major Incident Notification – Far Northern Region – Cairns Operations Centre – GWN Radio and Telephone Disruption – Restored At 1121 hrs, 04.05.2024 Cairns OpCen reported that GWN radio and telephones were not functional for a period of time. Operators were unable to accurately view vehicle or crew locations, receive radio messages or status updates. Critically, location of duress alarms were also not available. OpCen SOS advised that Sat PTT, mobile phones and satellite phones were being utilised as a work around during the disruption. Cairns SOS reports all operational crew had been advised of issues and advised of redundancy plans. FSG advised that GWN were called directly when the fault occurred. Restored: At 1200 hrs the State OpCen SOS confirmed that testing was complete, and fault has been resolved. The cause of this fault is unknown and will be further investigated Post Incident. Nil further operational impacts reported.

- Weather intelligence from the Bureau of Meteorology (BoM) has been reviewed, with no significant weather impacts expected over the next several days.

Critical Infrastructure

- ICT Major Incident Notification – Statewide – eARF Disruption - Restored**
The Service Centre reported multiple tickets reporting that QAS officers were unable to log into eARF on their operational iPad. Users were receiving 'incorrect username and password' when attempting to sign in. This degraded the agency's ability to view up-to-date records in the downstream reporting, reducing organisation review to occur and reducing ability for QLD Health to report on hospital workload metrics. After further investigation, it was confirmed that the certificates for the LDAP (Lightweight Directory Access Protocol) function had expired. During the disruption, FSG notified operational staff via email to use the eARF application in aeroplane mode. Operation Centre Supervisors were advised by FSG of the restoration so operational staff could be advised via radio. Data Centre Response (DCR) successfully updated the expired certificates on both Domain Controllers, and QAS has confirmed service restoration.
