

Wakhtiga ilmaha iyo ilkaha dadka waaweyn

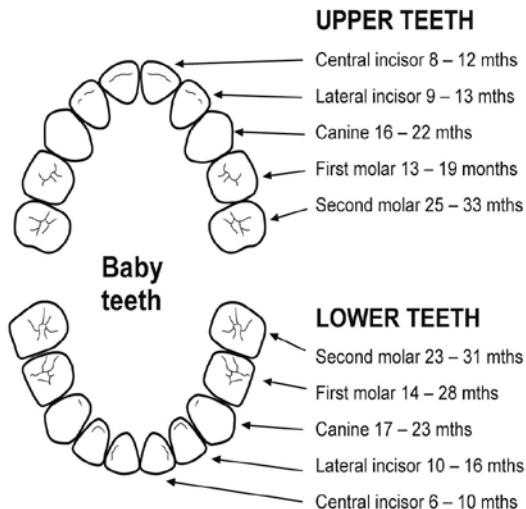

Xaashidan xaqiiqada waxa ay bixinaysaa hagitaan guud oo ku saabsan qiyasta da'da ee ilmaha (dhalaaya) iyo dadka waaweyn (joogta ah) ee laga yaabo inay ilkaha kasoo muuqdaan afka.

Xusuusnow in ilmo kastaa uu shakhsii yahay oo laga yaabo inuu ka dhaqso badan yahay ama ka gaabiyo soo bixista ilkuha marka loo eego shaxdan. Haddii aad ka walaacsan tahay soo bixista ilkaha oo gaabis ah, waqtiyada dillaaca ama ilkuhu u muuqdaan kuwo aanan isku xig xigin, la tasho dhakhtarka ilkaha. Carruurtu inta badan waxay u dhameystirmaan dhammaan ilkhooda dhallaanka markay 3 sano gaaraan.

Gowsaha qaangaarka ee ugu horreeya waxay qarxaan qiyastii lix ilaa toddoba sano jir. Ilkahaani waxay ka soo baxaan gowsaha labaad ee ilmaha gadaashooda (meesha u dambeysa ee afka, kor iyo hoos, dhinac kasta).

Ilkaha qaangaarka badanaa waxay u muuqdaan kuwo midab madow marka loo eego ilkaha ilmaha.
